## Man Supposedly Buried Here Reported Arrested In California

### MAY 14 DATE SET FOR FLOUNDER ROUND-UP

The big bait for the American Legion Flounder Roundup has been set. It was announced this week by a spokesman for the Clement R. Bontemps Post 139. After checking with weather predictions and tide forecast, and with several life-time fishermen here, the bait has been set for Friday, May 14. The event will start at 7 p.m. at the Legion, Sand Beach and end at that point at 11 p.m.

Local residents and visitors of ages from 16 to 90 may compete in the Roundup. All must register to be qualified to win any of the big prizes. There will be no change of fee of any kind to anyone to participate in the Flounder Roundup. The event is sponsored and paid for by the local Legion.

Ten big prizes are being offered. Payment will be made on the basis of the length of winning flounders. The lucky person spearing the longest flounder in the Roundup will receive \$100 per inch for his catch. Second flounder will receive 45¢ per inch; third, 40¢; fourth, 35¢; fifth, 30¢; sixth, 25¢; seventh, 20¢; eighth, 15¢; ninth, 10¢; and tenth, 5¢.

It is expected that the judges serving in the Legion's Junior Fishing Roundup last summer will be assisted by Val Flanagan. Serving last year were: Gen. Louis F. Goetz, Judge Nelus Rhodes and Judge M. D. (Pat) Rutherford.

### METHODIST CHOR PRESENTS CANTATA

Mrs. J. B. Goldman presented her junior choir in an Easter Cantata Friday night at the Main Street Methodist Church.

The fresh young voices, excellently trained by Mrs. Goldman, rose in exquisite cadences telling the glorious story of the resurrection of our Lord. The musical story began with the triumphant entry into Jerusalem and continued through the week of travail and agony climaxed with the rebirth of Christ on the first Easter Sunday some two thousand years ago.

The church was lighted with a large electric cross above the altar and tapers in the front of the rostrum. The vested choir filled into the church to the swelling strains played by Mrs. Goldman on the organ.

The church building was filled as the cantata staged by Mrs. Goldman and the choir are events looked forward to by all denominations.

### Regular Yacht Club Luncheon Well Attended

The regular monthly luncheon at the Bay Waveland Yacht Club Wednesday saw a number of small parties and several large parties enjoying the delicious food and later playing cards.

Mrs. C. C. McDonald was hostess. Serving on the committee with her were Mrs. John McDonald, Mrs. David McDonald, Mrs. C. E. Ripple, Mrs. H. H. Shattuck, Mrs. Dan Russell and Mrs. Sam Whitfield.

The tables in the dining room were all arranged with beautiful floral centerpieces.

At the long table occupied by Mrs. Egan's party pale pink roses and purple larkspur were beautifully arranged. Mrs. Lozano's guests were seated at a horseshoe table arrangement and several beautiful floral pieces of spring blooms were artistically gracing the tables at spaced intervals.

The tables seating the smaller groups had centerpieces of spring flowers.

### WIFE STILL INSISTS MAN BURIED HERE AS WILLIAM DOLAN IS HER HUSBAND

William Alan Dolan, mourned by his wife when authorities buried a body here she said was his, was reported to have turned up alive in Sacramento, Calif.

The development deepened the mystery of whose body it was that was recovered from the Mississippi river at Chalmette and buried after funeral services Feb. 21.

Sheriff John Egloff said an FBI check of fingerprints has identified the buried man Mrs. Dolan added to the mystery when she stated:

"The clothing returned to me as having come from the body was not my husband's—it was too large."

And there was a watch sent to me. My husband never wore a watch."

Dolan was missing for two weeks from his home at the time the drowning victim's body was recovered from the river.

Mrs. Dolan remarked yesterday "I think when he left here he was under the influence of dope."

However, there has been no previous indication Dolan was a narcotic user.

Even the State Legislature was involved in the Dolan matter.

Lawmakers were reading a \$2500 payment to Mrs. Dolan for her husband's unwarranted imprisonment, but decided later Dolan himself should get the money if he is alive.

Mrs. Dolan had identified the body from two scars.

Meantime, St. Bernard Sheriff N. P. Trist has reclassified the body as unidentified.

Whether the body in the grave here would be exhumed has not been decided.

### LOCAL MAIL BOX IMPROVEMENT WEEK IS ANNOUNCED

Postmaster General Arthur E. Sumnerfield has announced the week beginning May 17 as Mail Box Improvement Week.

This will be the 16th consecutive campaign to tidy up the official mail receptacles.

Postmaster Herlihy is requesting the rural patrons in this area to repair and beautify their mail box equipment and approaches to help lend brightness to the scenic beauty of the highway roads and drives.

The Post office Department is the most important agency in keeping the people of the nation informed. The rural delivery is a post office on wheels and many times these services are taken for granted and not fully appreciated. The carriers are trying to serve patrons promptly with as few mistakes as possible. Errors are sometimes caused by patrons' names being omitted on the box, especially when a substitute serves the route while the regular carrier is on vacation or sick leave. The substitute is not always acquainted with the route as well as the regular carrier.

Many boxes which are the highway billboards of the postal service have become unsightly with rust, unserviceable due to a leaky condition, broken doors or no lids, missing signals, no name, supports being bent or rotted which need replacing, weeds and wild grass grown around the supports and approaches, and in many places the ground is rough and full of chuck holes.

Postmaster Herlihy asked the patrons to cooperate in improving their mail box equipment during this period, May 17 to 24. He desires that the routes become a source of pride for the patrons, the Post office Department and the carriers. For those patrons desiring additional information on the proper size and height for their rural box they may gain this information from the postmaster or the rural carrier.

### FORMER RESIDENT DIES IN NEW ORLEANS SUN.

James Gilmore Jones, 59, of 3226 Calhoun St., New Orleans, died at his residence Saturday, April 17. He was the husband of Mayme Netto; father of Marsha Sierra and the late James G. Jones Jr.; also survived by three grandchildren.

The deceased was the brother of Mrs. Edward Heitzmann Sr., Miss Lillian Jones, Mrs. Pascual Piazza and Mrs. Henry Capdepon Sr., all of Bay St. Louis, and the late Albert Jones Jr. He was a native of Bay St. Louis and a resident of New Orleans for the last 10 years.

He was the son of the late Mr. and Mrs. Albert Jones.

The funeral was held from Piazza Funeral Home in Bay St. Louis Monday, April 19 at 10 a.m. Religious services from Our Lady of the Gulf Catholic Church with interment in St. Mary's Cemetery.

### CAR OVERTURNS ON HIGHWAY 90

## USE OF GLASS DATES BACK TO THE BEGINNINGS OF CIVILIZATION

Thousands of years ago, man first began to use glass. It is generally known that the first glass was made by the Egyptians. They discovered that when sand was heated in a fire, it melted and became a liquid. They then poured this liquid into a mold and let it cool. The result was a hard, transparent material called glass. This was the beginning of the glass industry. Since then, glass has become one of the most important materials in our civilization. It is used in a wide variety of products, from windows and bottles to lenses and optical instruments. The history of glass is a long and fascinating one, and it continues to play a vital role in our modern world.

## TO CONTINUE RESEARCH ON ATOMIC GENERATOR FOR ELECTRIC POWER

Atomic energy is being used to generate electricity in a number of ways. One of the most common is by using a nuclear reactor. This is a device that can produce a controlled chain reaction of nuclear fission. The energy released in this reaction is used to heat water, which then turns a turbine. The turbine is connected to a generator, which produces electricity. This is the basic principle of a nuclear power plant. The use of atomic energy for power generation is still in the early stages of development, but it has the potential to provide a large, clean source of energy.

## PROSPECTS FOR RECORD PARK ATTENDANCE SEEN THIS YEAR

The proposed opening of Mississippi's newest state park at Sardis Lake this May will signal the beginning of what park officials expect to be the most successful summer yet for the state's ten state parks system.

Last year a total of 522,000 persons visited the ten state parks. Officials expect this year's attendance to be as much as 20 to 30 percent higher.

Meanwhile, however, many improvements in the parks have been made at all parks, and the opening of the new 1,000-acre park at Sardis Lake is expected to attract as much as 20 to 30 percent more visitors than last year.

Hardy Hall, state park superintendent, says work is completed and soon a total of 20 and 15 display cabins should be accepted and opened for public use between May 1 and 15.

The improvements in the parks will be completely finished with attractive furniture which will include new electric tables, chairs and modern cooking ranges.

Plans also call for immediate installation of floating docks for privately owned boats, swimming areas, picnic facilities and boat launching.

A paved road now serves the lake from U. S. Highway 21 at Bartlett, which is the entrance to the park which is situated on what is known as the "Lost Lake" and is a prominent feature of the lake.

Summit, the new lake, is a beautiful park for both white and colored citizens at the recently completed Granada Dam and Reservoir.

With summer just around the corner, park visitors can expect to find some pleasant improvements at every one of the state's ten parks.

New furniture has been added in many of the parks, and swimming areas and additional rooms have been added to some parks. At Sardis Lake, for example, a new 1,000-acre lake has been added.

At Percy Quin State Park at McComb, the new 1,000-acre lake has been added. The new lake is situated on the western side of the dam.

### MISS ANN JENKINS

### BECOMES BRIDE SUN.

### OF CHARLES LANGLEY

Miss Ann Jenkins, daughter of Mr. and Mrs. A. R. Jenkins of Waveland and Mr. Charles Langley, son of the late Charles Langley and Dr. Mattie Langley of Jennings, Louisiana, were married Saturday April 17 at 3 p.m. in St. Charles Catholic Church in Waveland. The Rev. M. J. Costello performed the ceremony.

Mrs. George Thorne Jr., sister of the bride, was matron of honor, and Dr. William Langley, brother of the bridegroom, served as best man.

The young bride looked lovely in a white linen suit, navy blue blouse and navy shoes. She topped this attractive outfit with a small hat, flower trimmed. She carried a white mother-of-pearl prayer book, adorned with a cluster of white roses, from which cascaded white ribbons.

Mrs. Thorne wore a blue dress, black patent leather accessories, and a pink hat. Miss Jenkins was in a black ensemble with red accessories to complement her outfit.

Following the wedding ceremony the young couple drove to New Orleans where they spent their honeymoon at the Roosevelt Hotel. On Saturday evening while in the Blue Room of the Roosevelt, Ann was selected along with three others to try her skill at leading Sammy Kaye's orchestra. According to the applause, Ann was judged the best leader. She won several prizes, including champagne and a personally autographed picture by Sammy Kaye.

Out-of-town guests who joined the Jenkins family for the weekend and to attend the wedding were Mr. and Mrs. Forrest Jenkins and Mr. and Mrs. David Jenkins, their son, Joe, and daughter, Prissy, all of Junior, Kansas. Others included Mr. and Mrs. David Pulver Jr. and family from New Orleans, Mr. David Pulver Sr. of Jennings, La., and Mrs. B. W. Hebert, sister of the bridegroom, from Jennings, La.

Want some insurance against a food shortage this summer? You know that if we have another drought, pastures are likely to be short again. Right now grass and clover are really good. It will be good to take some of that surplus saving that you have and put it up as grass silage for use later this summer.

Even if we do not have another drought this year, Mr. Higgins says that cows should have access to high quality hay and or silage all year round.

**Birth Party**  
Leroy T. Luke Jr. was entertained with a party at the home of his parents, Mr. and Mrs. Leroy Luke, on Friday, April 8 on the occasion of his eighth birthday.

## COUNTY AGENT'S NOTES

BY HOWARD F. SIMMONS  
Hancock County Agent

### DAIRY

Here is how you can do a lot to lessen the strain of reduced milk prices. L. A. Higgins Extension dairyman, says that selling off cows that won't produce as much as more than 5,000 pounds of milk per year will help a lot.

These cows do not produce enough to pay for their feed, give a fair labor return, pay interest on investment and take care of depreciation.

Make your milk quality stand out. Grazing and high quality stand out. Grazing and high quality stand out. Grazing and high quality stand out.

Want some insurance against a food shortage this summer? You know that if we have another drought, pastures are likely to be short again. Right now grass and clover are really good. It will be good to take some of that surplus saving that you have and put it up as grass silage for use later this summer.

Even if we do not have another drought this year, Mr. Higgins says that cows should have access to high quality hay and or silage all year round.

**CORN**  
Got your corn planted yet? Don't wait too late. Records show that April planted corn usually does better than late planted corn. If you have not planted yet there is still plenty of time. Do the job right and make some high yields. Follow the seven steps to high corn yields.

The plenty of fertilizer use the right land-deep well-drained soil is best. Plant corn in rows. However, next plant thick, use a recommended hybrid or variety. See your county agent for the latest in corn production recommendations for growing high yields.

**PASTURES**  
Here are some pasture jobs that need doing through the rest of April: Plant some temporary grazing crops, but hold the major portion of Sudan and millet acreage for later planting.

Manage your pastures. Don't start grazing permanent pastures too soon. Let them get well established first. Sweet potatoes are ready for harvest. Whether you cut it in the dough stage or leave it to mature and combine it, you can plant soybeans in Hancock County.

**SWEET POTATOES**  
The main commercial sweet potato crop should be planted during April and May. However, plantings made in June will normally give a fair yield of smaller potatoes and seed stock.

The U.S. Dept. of Agriculture is still the variety recommended for most commercial production. However, an old-timer is reborn with stem rot diseases, Goldrush and All-true are gaining in popularity.

Fertilizer recommendations for sweet potato production on average soils is 80 to 100 pounds of a complete fertilizer such as 8-8-8. If soil test shows that only nitrogen is needed, 40 to 50 pounds of actual nitrogen per acre will give good results with sweet potatoes. The fertilizer should be applied and mixed well with the soil a week or more in advance of planting.

Sweet potato plants are frost tender and should not be planted until danger of frost is past.

**COMMON EYE PROBLEMS—**  
**Myopia**  
A common eye problem is nearsightedness or myopia. If you are nearsighted you have difficulty focusing on objects that are not near to your eyes—beyond arm's length.

City children are more likely to be myopic than those who live out of doors in the country. During summer vacation the nearsightedness improves with the changed environment, but comes back when the child returns to school.

Unless myopia is properly treated when a child is young it may become progressive and become more severe the older the child gets.

One correction for myopia is lenses and another is orthotics or visual training by which a child is taught to focus at a distance. In many cases both lenses and orthotics are prescribed.

## Sparkling Day Sunday Graces Easter Parade

A sparkling day dawned Easter Sunday in Bay St. Louis with just enough sunshine to make the day a happy one. The Easter Parade took place at all churches in the morning and was one of the finest in the history of the town with a variety of floats and bands.

Real numbers of visitors as well as home-folk were in attendance. The Automobile traffic was extremely heavy. The beaches were filled with picnickers, sun bathers and enjoyed early summer during the entire day.

All types of small craft dotted the blue waters of the Bay and gay throngs visited the Yacht Club enjoying the beginning of the summer activities there.

Schools and fraternities from the New Orleans school set started about 10:00 a.m. from school grounds and the City. Local boys and girls attending schools away from the community were home to enjoy the spring holidays with families many of them bringing visitors.

The tiny set were entertained with numerous gun shots and fully loaded little girls and smartly dressed boys were waving. Easter bunnies, all over town and indulging in the age old custom of egg fights.

The glory of Easter was truly in Bay St. Louis this year.

## OFFICIALS PRAISE CLAY PLANT OPERATION

The operations of the W. S. Dickey Clay Mfg. Co., located at Meridian, has been praised by the top officials of the State and the local community.

It also was announced by the superintendent of this plant that local production would reach 2,500 tons per month, well ahead of previous estimates.

The W. S. Dickey Clay Mfg. Co. is one of Meridian's newest industries, and was located by Dickey Clay under Mississippi's BAWI plan.

## PLANTING FACTORS AFFECT COTTON-PICKER OPERATION

Growing cotton that can be harvested efficiently with mechanical pickers has been the object of a number of studies conducted by the Mississippi Agricultural Experiment Station and the U.S. Department of Agriculture at the Delta Branch Station at Stoneville.

Field layout has been found extremely important in planning for mechanical picking. Long rows and wide turn alleys are needed, but spot and surface irregularities should be eliminated.

The complete report is published in the April issue of Mississippi Farm Research available on request at the Experiment Station at State College.

## MISSISSIPPIAN WINS KEY TELEPHONE COMPANY POST

JACKSON—John C. Underwood, a native of Tate County has just been appointed to one of the top managerial posts with the Southern Bell Telephone and Telegraph Company in Mississippi, his title being Mississippi Plant Superintendent.

Announcement of Mr. Underwood's new position was made by H. G. Turner, the company's General Manager for Mississippi, who states that Mr. Underwood's promotion is one of many earned since he began his career with Southern Bell, approximately 30 years ago.

"Mr. Underwood is well-known in Mississippi," Mr. Turner stated, "as he served the company in this state for about 15 years, coming here after approximately a year's general training in Atlanta. He joined Southern Bell forces there in 1924 following his graduation from Mississippi State College in Starkville."

"He began work over here," Mr. Turner continued, "as Transmission Engineer and had worked his way up to Division Construction Supervisor by 1941 when he received a leave of absence to enter the armed services where he served with great distinction."

Mr. Underwood was commissioned a captain in the Anti-Aircraft Section of the U. S. Coast Artillery Reserve and served in the Philippines, Okinawa and Korea.

He was awarded the Legion of Merit, Purple Star with Cluster, the Purple Heart and Commendation's Legion of Merit badge for his service in Korea in 1945-46 as Director of Mining and Industry South of the 38th parallel.

Later, he served as a member of the first Soviet-American Commission to meet under paragraph 104 of the Potsdam Agreement.

## ACADEMY SEARCHING FOR SCIENCE TALENT IN HIGH SCHOOLS

The Mississippi Academy of Science is searching for science talent in the high schools of Mississippi, and is conducting a statewide contest that provides prizes for students in both junior and senior high schools.

Final details of the contest are being worked out by the talent search committee, headed by Professor C. B. Davis of the Mississippi College-Baptist department.

Seeking a way to promote the study of science in high schools, the Academy is trying to help meet the needs of Mississippi industry, and to produce competent scientists to remain in Mississippi and help build a greater state through science.
